\$111 (\$101 plus \$10 Shipping)

The AV-100 is a hardwired door chime system takes a little more time to install, but with a plug-in transformer to power its electric eye, batteries are never needed. Just install and relax; the door bell system will alert with a chime for every entry or exit. This is the door announcer for retail stores anywhere. This unit has proved great for high traffic locations and holds up well over many years of operation. With a pleasant sounding electronic chime, this unit alerts every time someone enters

**the business and can provide a count of customers as well. The motion detecting door announcer will keep owners alert to whenever the door opens for customers to enter or exit the business. With the customer announcing business, the Rodann AV100 becomes a most efficient assistant in back of store. Infrared motion activated. Under carpet-pad type available.**
